

EN: This Datasheet is presented by the manufacturer.

Please visit our website for pricing and availability at www.hestore.hu.

Features

- Single-turn (3851 and 3852)
- 3-3/4-turn (3856)
- Linear and audio tapers
- Wide resistance range
- Minimal depth package
- Good resolution

3851/3852/3856 - 3/4 " Diameter Panel Control

Initial Electrical Characteristics¹

	3851 Conductive Plastic Element	3852/3856 Cermet Element
Standard Resistance Range		
Linear Tapers (A, B, E, and H)	1 K to 1 megohm	100 ohms to 1 megohm
Audio Tapers (C, D, F, and G)	1 K to 1 megohm	1 K ohms to 1 megohm
Total Resistance Tolerance	±10 % or ±20 %	±5 % or ±10 %
Independent Linearity	±10 %	(A & H tapers) ±5 %
Absolute Minimum Resistance	2 ohms maximum	2 ohms maximum
Effective Electrical Angle	(Linear tapers) 250 ° ±5 °	(Linear tapers) 250 ° ±5 °
	(Audio tapers) 225 ° ±5 °	(Audio tapers) 225 ° ±5 °
Contact Resistance Variation	±1 %	±3 % of total resistance or 3 ohms (whichever is greater)
Dielectric Withstanding Voltage (MIL-STD-202, Method 301)		
Sea Level	900 VAC minimum	900 VAC minimum
70,000 Feet	350 VAC minimum	350 VAC minimum
Insulation Resistance (500 VDC)	1,000 megohms minimum	1,000 megohms minimum
Power Rating (Voltage Limited By Power Dissipation or 350 VAC, Whichever Is Less)		
+70 °C	(Linear tapers) 1 watt	(Linear tapers) 2 watts
	(Audio tapers) 0.5 watt	(Audio tapers) 1 watt
+125 °C	0 watt	
+150 °C		0 watt
Theoretical Resolution	Essentially infinite	Essentially infinite

Environmental Characteristics¹

Operating Temperature Range	-1 °C to +125 °C	-1 °C to +125 °C
Storage Temperature Range	-65 °C to +125 °C	-65 °C to +150 °C
Temperature Coefficient Over		
Storage Temperature Range	±1,000 ppm/°C	±150 ppm/°C
Vibration	20 G	20 G
Total Resistance Shift	±2 % maximum	±2 % maximum
Voltage Ratio Shift	±5 % maximum	±6 % maximum
Shock	100 G	100 G
Total Resistance Shift	±2 % maximum	±2 % maximum
Voltage Ratio Shift	±5 % maximum	±6 % maximum
Load Life	1,000 hours	1,000 hours
Total Resistance Shift	±10 % maximum	±3 % maximum
Rotational Life (No Load)	100,000 cycles	20,000 cycles
Total Resistance Shift	±15 % TRS maximum	±5 % or 5 ohms TRS whichever is greater
Contact Resistance Variation	±3 %	±3 %
Moisture Resistance (MIL-STD-202, Method 103, Condition B)		
Total Resistance Shift	±10 % maximum	±2 % maximum
IP Rating	IP 40	IP 40

¹ At room ambient: +25 °C nominal and 50 % relative humidity nominal, except as noted.

WARNING Cancer and Reproductive Harm - www.P65Warnings.ca.gov

*RoHS Directive 2015/863, Mar 31, 2015 and Annex.

Specifications are subject to change without notice.

Users should verify actual device performance in their specific applications.

3851/3852/3856 - 3/4 " Diameter Panel Control

BOURNS®

Mechanical Characteristics¹

Stop Strength	
3851 & 3852	56.5 N-cm (5 lb.-in.)
3856.....	Continuous turn
Mechanical Angle.....	280 ° ±5 ° / 3856 – 1350 ° ±50 °
Torque (Starting and Running)	A & B bushings 0.35 to 4.23 N-cm (0.05 to 6.0 oz.-in.)
	C & E bushings 0.21 to 4.23 N-cm (0.3 to 6.0 oz.-in.)
	3856 – 0.11 to 2.12 N-cm (0.15 to 3.0 oz.-in.)
Mounting (Torque on Bushing)	1.7-2.0 N-m (15-18 lb.-in.) maximum
Weight (Single Section)	30 grams maximum
Terminals	Printed circuit terminals or solder lugs
Soldering Condition	Recommended hand soldering using Sn95/Ag5 no clean solder, 0.025 " wire diameter.
	Maximum temperature 399 °C (750 °F) for 3 seconds. No wash process to be used with no clean flux.
	Part can be wave soldered at 260 °C (500 °F) for 5 seconds, no wash process with no clean flux.
Marking	Manufacturer's trademark, wiring diagram, resistance, date code, and part number
Ganging (Multiple Section Potentiometers).....	1 cup maximum
Hardware.....	One lockwasher and one mounting nut is shipped with each potentiometer, except where noted in the part number.

¹ At room ambient: +25 °C nominal and 50 % relative humidity nominal, except as noted.

Specifications are subject to change without notice.

Users should verify actual device performance in their specific applications.

3851/3852/3856 - 3/4 " Diameter Panel Control

BOURNS®

How To Order

3852 A - 28 2 - 103 A L

SHAFT TYPE (FMS) & DIAMETER		AVAILABLE ONLY IN	
		MODELS	BUSHINGS
12	3/8 " (9.53 mm) L X 1/8 " (3.18 mm) D	3851, 3852	C
16	1/2 " (12.7 mm) L x 1/4 " (6.35 mm) D	3851, 3852	A
16	1/2 " (12.7 mm) L x 1/8 " (3.18 mm) D	3851, 3852	C, E
20	5/8 " (15.88 mm) L X 1/4 " (6.35 mm) D	3851, 3852	A, B
28	7/8 " (22.20 mm) L X 1/4 " (6.35 mm) D	3851, 3852 3856	A, B A
28	7/8 " (22.20 mm) L X 1/8 " (3.18 mm) D	3851, 3852 3856	C, E H

Consult factory for lengths not shown.

BUSHING	APPLICABLE MODELS
A Plain 3/8 " (9.53 mm) D x 3/8 " (9.53 mm) L	3851, 3852, 3856
B Locking 3/8 " (9.53 mm) D x 1/2 " (12.7 mm) L	3851, 3852
C Plain 1/4 " (6.35 mm) D x 1/4 " (6.35 mm) L	3851, 3852
E Locking 1/4 " (6.35 mm) D x 1/2 " (12.7 mm) L	3851, 3852
H Plain 3/8 " (9.53 mm) D x 3/8 " (9.53 mm) L	3856 (3.18 mm D Shaft)

MODEL
3851 3/4 " (19.05 mm) D Single-Turn C.P.
3852 3/4 " (19.05 mm) D Single-Turn Cermet
3856 3/4 " (19.05 mm) D 3-3/4-Turn Cermet

Boldface features are Bourns standard options.
All others are available with higher minimum order quantities.

TERMINAL STYLE AND SHAFT TYPE
1 Solder Lugs, Plain End
2 Solder Lugs, Slotted End
3 Solder Lugs, Flatted Shaft
5 PC Pins, Plain End
6 PC Pins, Slotted End
7 PC Pins, Flatted Shaft

B Linear ±20 %	3851
C Audio CW ±10 %	3852, 3856
D Audio CW ±20 %	3851
E Linear ±10 %	3851
F Audio CCW ±10 %	3852, 3856
G Audio CCW ±20 %	3851
H Linear ±5 %	3852, 3856

REV. 03/19

Specifications are subject to change without notice.

Users should verify actual device performance in their specific applications.

The products described herein and this document are subject to specific legal disclaimers as set forth on the last page of this document, and at www.bourns.com/docs/legal/disclaimer.pdf.

This legal disclaimer applies to purchasers and users of Bourns® products manufactured by or on behalf of Bourns, Inc. and its affiliates (collectively, "Bourns").

Unless otherwise expressly indicated in writing, Bourns® products and data sheets relating thereto are subject to change without notice. Users should check for and obtain the latest relevant information and verify that such information is current and complete before placing orders for Bourns® products.

The characteristics and parameters of a Bourns® product set forth in its data sheet are based on laboratory conditions, and statements regarding the suitability of products for certain types of applications are based on Bourns' knowledge of typical requirements in generic applications. The characteristics and parameters of a Bourns® product in a user application may vary from the data sheet characteristics and parameters due to (i) the combination of the Bourns® product with other components in the user's application, or (ii) the environment of the user application itself. The characteristics and parameters of a Bourns® product also can and do vary in different applications and actual performance may vary over time. Users should always verify the actual performance of the Bourns® product in their specific devices and applications, and make their own independent judgments regarding the amount of additional test margin to design into their device or application to compensate for differences between laboratory and real world conditions.

Unless Bourns has explicitly designated an individual Bourns® product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949) or a particular qualification (e.g., UL listed or recognized), Bourns is not responsible for any failure of an individual Bourns® product to meet the requirements of such industry standard or particular qualification. Users of Bourns® products are responsible for ensuring compliance with safety-related requirements and standards applicable to their devices or applications.

Bourns® products are not recommended, authorized or intended for use in nuclear, lifesaving, life-critical or life-sustaining applications, nor in any other applications where failure or malfunction may result in personal injury, death, or severe property or environmental damage. Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any Bourns® products in such unauthorized applications might not be safe and thus is at the user's sole risk. Life-critical applications include devices identified by the U.S. Food and Drug Administration as Class III devices and generally equivalent classifications outside of the United States.

Bourns expressly identifies those Bourns® standard products that are suitable for use in automotive applications on such products' data sheets in the section entitled "Applications." Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any other Bourns® standard products in an automotive application might not be safe and thus is not recommended, authorized or intended and is at the user's sole risk. If Bourns expressly identifies a sub-category of automotive application in the data sheet for its standard products (such as infotainment or lighting), such identification means that Bourns has reviewed its standard product and has determined that if such Bourns® standard product is considered for potential use in automotive applications, it should only be used in such sub-category of automotive applications. Any reference to Bourns® standard product in the data sheet as compliant with the AEC-Q standard or "automotive grade" does not by itself mean that Bourns has approved such product for use in an automotive application.

Bourns® standard products are not tested to comply with United States Federal Aviation Administration standards generally or any other generally equivalent governmental organization standard applicable to products designed or manufactured for use in aircraft or space applications. Bourns expressly identifies Bourns® standard products that are suitable for use in aircraft or space applications on such products' data sheets in the section entitled "Applications." Unless expressly and specifically approved in writing by two authorized Bourns representatives on a case-by-case basis, use of any other Bourns® standard product in an aircraft or space application might not be safe and thus is not recommended, authorized or intended and is at the user's sole risk.

The use and level of testing applicable to Bourns® custom products shall be negotiated on a case-by-case basis by Bourns and the user for which such Bourns® custom products are specially designed. Absent a written agreement between Bourns and the user regarding the use and level of such testing, the above provisions applicable to Bourns® standard products shall also apply to such Bourns® custom products.

Users shall not sell, transfer, export or re-export any Bourns® products or technology for use in activities which involve the design, development, production, use or stockpiling of nuclear, chemical or biological weapons or missiles, nor shall they use Bourns® products or technology in any facility which engages in activities relating to such devices. The foregoing restrictions apply to all uses and applications that violate national or international prohibitions, including embargos or international regulations. Further, Bourns® products and Bourns technology and technical data may not under any circumstance be exported or re-exported to countries subject to international sanctions or embargoes. Bourns® products may not, without prior authorization from Bourns and/or the U.S. Government, be resold, transferred, or re-exported to any party not eligible to receive U.S. commodities, software, and technical data.

To the maximum extent permitted by applicable law, Bourns disclaims (i) any and all liability for special, punitive, consequential, incidental or indirect damages or lost revenues or lost profits, and (ii) any and all implied warranties, including implied warranties of fitness for particular purpose, non-infringement and merchantability.
